

WAXING AFTERCARE

Thank you for choosing us for your waxing service. Please follow the guidelines below to ensure your skin is cared for properly over the next few days.

Please note that some slight soreness, small bumps and redness are common and perfectly normal and temporary reactions, particularly if this is your first wax. These symptoms should subside over the next 24-48 hours. If you experience persistent redness or irritation, or if you have any questions, please do not hesitate to contact me.

Keep the waxed area clean, and avoid heat and friction during the next 24-48 hours.

This means:

- No hot baths or showers (cool to lukewarm water only)
- No saunas, hot tubs, or steam treatments
- No tanning (sunbathing, sunbeds, or fake tans)
- No sports, gym workouts, or other exercise
- Avoid scratching or touching the treated area with unwashed hands
- Wear clean, loose-fitting clothes
- Avoid swimming in chlorinated pools
- Do not apply deodorants, body sprays, powders, lotions, or other products to the area, other than those recommended by your therapist

To soothe and protect the skin, apply an antiseptic cream to the waxed area regularly for 3 days following your treatment. Always wash your hands before applying any product.

To prevent ingrown hairs: starting a few days after your appointment, gently scrub the skin 3 times a week in the bath or shower. Use a loofah or exfoliating mitt. Moisturize the area every day, which will keep the skin supple and help new hairs to grow normally.

You may notice a small amount of regrowth after a week or so. It can take up to 4 treatment for your hair to get on a growth cycle that gives best results. Hair needs to be at least ½ cm long before it can be successfully removed by waxing. Please do not shave between your appointments. To maintain your smooth appearance, we recommend regular waxing every 4-6 weeks.
